

List of modules included in each package

" Customized " : Compose your version of ADS yourself by selecting only the modules you want to add to ADS-Homebuilder

Versions:	ADS-Light	ADS-Homebuilder	ADS-Pro	ADS-Corporate *	" Customized " *	ADS-Education	Description
Standard Versions	99.5 €	295 €	1 705 €	- €	- €	495 €	
Number of licenses	1	1	1	1	1	5	
CAD							
Generation of the 3D-Model	x	x	x	x	x	x	Set of tools to generate the 3D model of an airplane
Processing							
Geometry Analysis	x	x	x	x	x	x	Set of tools to perform the geometric analysis of an airplane
Reverse Engineering	x	x	x	x	x	x	Set of tools to perform the reverse engineering of an airplane
Performance Analysis		x	x	x	x	x	Set of tools to perform the performance analysis for different flight conditions
Conceptual Design		x	x	x	x	x	Set of tools to size an airplane according to specifications
Stability							
Weight & Balance		x	x	x	x	x	Compute the CG Position for different load cases
Control & Stability		x	x	x	x	x	Compute the CG Limits and Aerodynamics centre location
Tools							Set of tools to show the influence of the geometric parameters on the mass
Technical Notes	x	x	x	x	x	x	Set of Technical Notes to explain the algorithms used
Database							Set of editable and modifiable database
Airplane	5	5	5	5	5	5	Database of airplanes (UAV, Light Airplane)
Engines			+ 245				Database of engines (IC, Turbopropeller, Electric motor)
Airfoils			+ 1300				Database of airfoils
Materials	x	x	x	x	x	x	Database of materials
Batteries	x	x	x	x	x	x	Database of batteries
Tires			+ 240				Database of tires
Fuel	x	x	x	x	x	x	Database of fuels
Regulation	x	x	x	x	x	x	Database of regulations
Export							
STL	x	x	x	x	x	x	Generation of files in stl format (to export to CAD Software, 3D-Printers...)
Options							
Stability							
Stability Derivatives			x	x		x	Compute all stability derivatives for different flight conditions
Dynamic Stability				x		x	Compute the lateral and longitudinal eigenmodes, Frequential response, Step response
Cost Analysis							
Market Price			x	x		x	Compute the market price
R&D			x	x		x	Compute the development and manufacturing costs
Operating			x	x		x	Compute the operating costs
Breakeven Point			x	x		x	Compute the breakeven point
Aerodynamic							
Lift Distribution			x	x		x	Compute the lift distribution according to the geometry and the flight conditions
Xfoil				x		x	Compute the aerodynamic performance of any shape using Xfoil
Processing							
Design Constraints			x	x		x	Accept or reject automatically the results according to defined criteria
Quality			x	x		x	Perform comparative analysis with the airplanes of the database
Optimisation							
Shape (CSP, Offset, DZ...)				x		x	Allow shape control which influence aerodynamics and manufacturing
List of Airfoil Candidates			x	x		x	List automatically the best airfoils according to the flight conditions
List of Engine Candidates			x	x		x	List automatically the best engines to fulfill the requirements
Multiple Runs				x			Automatically perform several successive runs and display the differences between the runs
Expertise (check stability)				x			Give the user instructions to increase stability
Structure							
Internal components (Airframe)			x	x		x	Generate automatically the airframe (spars, ribs, frames...)
Checks							
Interference between components			x	x		x	Check interference between components (crew, tanks, airframe, control surface...)
Specific							
Ducted propeller				x		x	Compute the performance of an airplane with a ducted propeller
Classification							Allow the generation and analysis of airplanes belonging to:
Light Transport				x		x	The light transport category
Light Business - Business				x		x	The light business & business category
Airliners				x			The airliner category
Categories							Allow the generation and analysis of airplanes belonging to:
Seaplane				x		x	The seaplane category
Technical Assistance (On-Line) + New releases							On-Line technical assistance and free access to the new releases
3 Months							
6 Months				x			
9 Months							
12 Months					x		
Additional Data Files							Dataset created for Reverse Engineering
Light Aircraft, UAV							
Light Business, Light Transport							
Airliners							

Don't hesitate to request a Demo before purchasing.

Spoken languages: English/French
